EMPLOYMENT & EXPERIENCE

Tartan HQ (tartanhq.com)

Fulltime | Senior Frontend Engineer   *May 2022 - Present*

Working with Tartan, which is an early-stage startup, on verification product.

- Led a team of 3 as Frontend pod lead, responsible for delivering key deliverables according to stakeholder priorities.
- Took ownership of the entire Frontend, ensuring timely and high-quality delivery of product features.
- Contributed to the development of an income and work history verification product that integrates with HRMS/payroll and Payslip OCR to streamline the loan vendor process.

Springworks (springworks.in)

Fulltime | Software Engineer   *April 2021 - April 2022*

Trivia - Multi-platform Employee Engagement Product (Slack, MS Teams, Web, Zoom)

- Led a team of 2 developers and 2 interns to successfully deliver Trivia for Web, prioritizing readability and modularity to improve efficiency and speed up development.
- Took ownership of the entire Frontend, maintaining coding standards and reviewing pull requests across multiple projects.
- Mentored 2 software engineering interns, providing guidance on best practices, and helping them effectively contribute to the codebase.

Freelance Developer (corpworx.com, realpha.com)

Upwork | React Developer   *January 2021 – April 2021*

Sourced clients from Upwork and successfully completed projects for Corpworx.com and Realpha.com.

- Developed an internal tool for Realpha using React and Material-UI, providing insights about a property or location based on proximity to markets, transportation, safety, and other parameters.
- Built custom UI components for Corpworx.com to display API attributes, descriptions, and parameters in a structured format for a client API documentation project.
- Ensured the components were mdx compatible for improved documentation accessibility and readability.

Ghrix Technologies Pvt. Ltd. (ghrix.com)

Full time | Software Engineer (MERN Stack)   *January 2020 – December 2020*

Ghrix Technologies is a web development agency.

- Worked on a team of 2 frontend developers to successfully deliver a drag and drop website builder for a SaaS product.
- Collaborated with clients from the US to deliver an agency website coupled with a WordPress headless CMS and Gatsby frontend.
- Contributed to the development of a SaaS product, focusing on the frontend aspects of the drag and drop website builder.
- Developed and maintained high-quality code to ensure that projects were delivered on time and within scope

Projects

Dev.to Clone ([Live](#))

A Clone on blogging site like devto or medium. Built with Nextjs and firebase

- Designed and modeled data in Firebase and developed a dev.to clone using Next.js.
- Implemented unique username selection in real-time and enabled users to like, create, view, and save drafts of posts using a mdx editor.
- Utilized server-side rendering and static page generation to optimize website performance and user experience.
- Created a project from scratch, working independently to deliver a high-quality product and improve technical skills
